Functions

Pan/Tilt

Rotate your camera by sliding on your smartphone, providing you with 360 degrees of vision.

Two-way audio

When you see a visitor from the live view of camera, you can call and then communicate with the visitor by your App function.

Motion tracking

The camera will rotate to track person movements automatically when the function is enabled, keeping the person in the middle of the image, which can greatly improve the effectiveness and accuracy of monitoring.

Sound detection

The camera will detect abnormal sounds, and send you push notifications and app alerts.

Private mode

You can turn on the privacy mode according to needs. When the function is enabled, the camera will be in sleep mode without monitoring, which can help to protect your privacy.

Video flip

Flip your video stream up or down for maximum flexibility.

Motion detection

Built-in motion sensors detect movement, and the camera will send you push notifications and app alerts.

Record

Support 24H continuous recording with high capacity SD storage or Cloud storage.

Day & Night

Never miss a moment, even in complete darkness, with powerful night-vision technology.

FAQ

Q: The device cannot be previewed properly?

A: Check whether the network is normal, you can place the camera close to the router, and if not, it is recommended to reset the device and add it again.

Q: Why is it still in the list of devices after resetting?

A: The reset device only resets the network configuration of the camera, but cannot change the configuration on the App, remove the camera, and must be deleted by the App.

Q: How to cut the camera network to another router?

A: First remove and reset the device on the App and then configure the device again by the App.

Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in SD card after power cut. Confirm whether the SD card is normally available and the format is FAT32. And the TF card can't be identified when the internet environment is not good.

Q: Why I can't get the notifications with my cell phone App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened; Message notification and authority confirmation in the mobile phone system have been opened.

Please consult this checklist for all parts.
